Recent Work Experience

GLAAD, Front-End Web Developer | July 2016 to present

- Develop and implement new Drupal theme to match design created by third party vendor for GLAAD.org redesign to ensure site is accessible, cross browser compatible, and mobile-responsive
- Design, develop, and implement mobile-first microsites for a variety of new programs
- Maintain, update, and improve GLAAD website and blog, including event promotions and registration, press resources, as well as action alerts and other programmatic content
- Design, develop, target, and send responsive HTML emails to our supporters
- Work with other departments to ensure consistency in branding and style across online platforms
- Manage multiple tasks simultaneously in fast-paced work environment
- Provide technical support for entire organization

Freelance, Front-End Web Developer | January 2015 to present

- Develop responsive, mobile-first solutions for a variety of clients, including single page applications using Django, WordPress, JavaScript/jQuery, HTML5 and CSS3
- Work with clients to create visually stunning designs, make design comps in Photoshop, and establish user friendly site information architecture

Socialserve.com, Regional Manager, Pacific Division | May 2013 to December 2014

- Engaged clients to create strategic brand development to increase user base and meet contractual outcomes
- Collaborated with multiple teams (both internal and external) to develop more efficient processes to scale the product and grow the user base
- Worked closely with internal development team to deliver software updates that met specific client needs while maintaining integrity of the software for all clients
- Led training sessions targeting a range of audiences, including: professional users, new potential clients, rental seekers, and service stakeholders

Spokane Housing Authority, Software Support Specialist | October 2012 to May 2013

- Led committee to evaluate efficiency of enterprise level property management software in use by the Housing Authority
- Created technical guides for property management software to be used by staff
- Provided Technical Support for entire organization
